

2006 EVHA GOLD MEDAL COLD CLIMATE AFFORDABLE HOME BY ASPEN HOMES OF COLORADO

Aspen Homes of Colorado, Inc. was the proud recipient of two 2006 Energy Value Housing Awards (EVHA), the only builder in the nation to receive two Gold Medals in 2006.

The EVHA is presented annually by the National Association of Home Builders (NAHB) and is a signature honor for the energy efficient elite. It recognizes builders who integrate energy efficiency into the design, construction and marketing of new homes.

According to the judges, *"Aspen Homes of Colorado has it together. All facets of building, marketing, public relations, quality assurance, and others are managed skillfully. They are a leader of the industry."* Aspen's award-winning home was selected because its owner will "get every penny's worth". Some of its noteworthy features include: A sealed-combustion tankless hot water heater; sealed-combustion 92.1% efficient furnace; and gas filled LowE windows.

The EVHA is managed by the NAHB Research Center and the U.S. Department of Energy through the National Renewable Energy Laboratory. The NAHB Research Center was founded over 40 years ago and is the international source for reliable, objective information and research on housing construction and development issues.

For more information about the EVHA, visit www.nahbrc.org/evha/
