

2006 EVHA GOLD MEDAL COLD CLIMATE PRODUCTION HOME BY ASPEN HOMES OF COLORADO

The Energy Value Housing Award (EVHA) is one of the most prestigious homebuilding awards in the nation. The award honors builders who successfully integrate energy efficiency into every aspect of new home production, as showcased by a specific home. Aspen Homes was honored to receive the 2006 Gold award for the Production category, which recognizes their excellence in home design, construction, and marketing practices replicated in multiple homes.

According to the EVHA judges, "This business has it all together. All facets of building, marketing, public relations, quality assurance, and others are managed skillfully. They are a leader of the industry."

Aspen Home's outreach to customers is remarkable. Several times each year, it sponsors a seminar for customers about caring for their homes. Aspen feels that the events not only show good will toward customers, but the education allows customers to talk confidently about energy-efficient construction to their friends and family.

The EVHA is presented by the National Association of Home Builders Research Center, the National Renewable Energy Laboratory, and the U.S. Department of Energy.
